

## Nominee: Fujitsu RunMyProcess

---

### **Nomination title: Removing barriers to digital transformation with Fujitsu RunMyProcess**

Fujitsu RunMyProcess is a unique cloud platform (PaaS) that enables hundreds of leading companies in over 45 countries to remove the technology barriers to digital transformation. Our innovative platform empowers our customers to rapidly create, deploy and distribute highly customised enterprise and mobile business applications designed to meet their specific needs - unifying user experiences, connecting silos of information, reducing time to value and enabling digital scale.

We transform work styles and enable new mobile business models by delivering applications that seamlessly follow users across all of their devices as they go about their day – all accessed via Enterprise Process Stores that are as individual as each customer’s business.

We accelerate business outcomes and improve satisfaction by connecting people, systems and data in real time – all thanks to sophisticated API management and a library of over 2,500 connectors spanning on-premise and cloud environments.

We empower organizations to deliver and adapt their IT systems at the speed of business change, reducing time to value and supporting continuous, data-based improvement – all via the rapid creation, distribution and change of connected systems.

We free our customers to focus on the things that make them special and act as their partner for disruption-free digital growth – all thanks to our business level abstractions, cloud native architecture and industrialized approach to operations.

### **Why nominee should win**

Our platform as a service helps our clients:

- Unify digital experiences
- Connect digital services
- Enable change at a digital speed
- Deliver applications at a digital scale
